**About Color Variations:** No two wood planks are alike, and color variation is a natural characteristic of wood. Over time, wood changes color due to sunlight and the oxidation process. Since wood is a natural material, there is no set formula to maintain consistent colors. Customers should be aware of these changes and understand the characteristics of the wood species they select before placing an order. Certain wood products may darken over time, while others may lighten. These gradual color changes are a natural occurrence in all wood species, are considered normal, and are not covered under warranty.
